

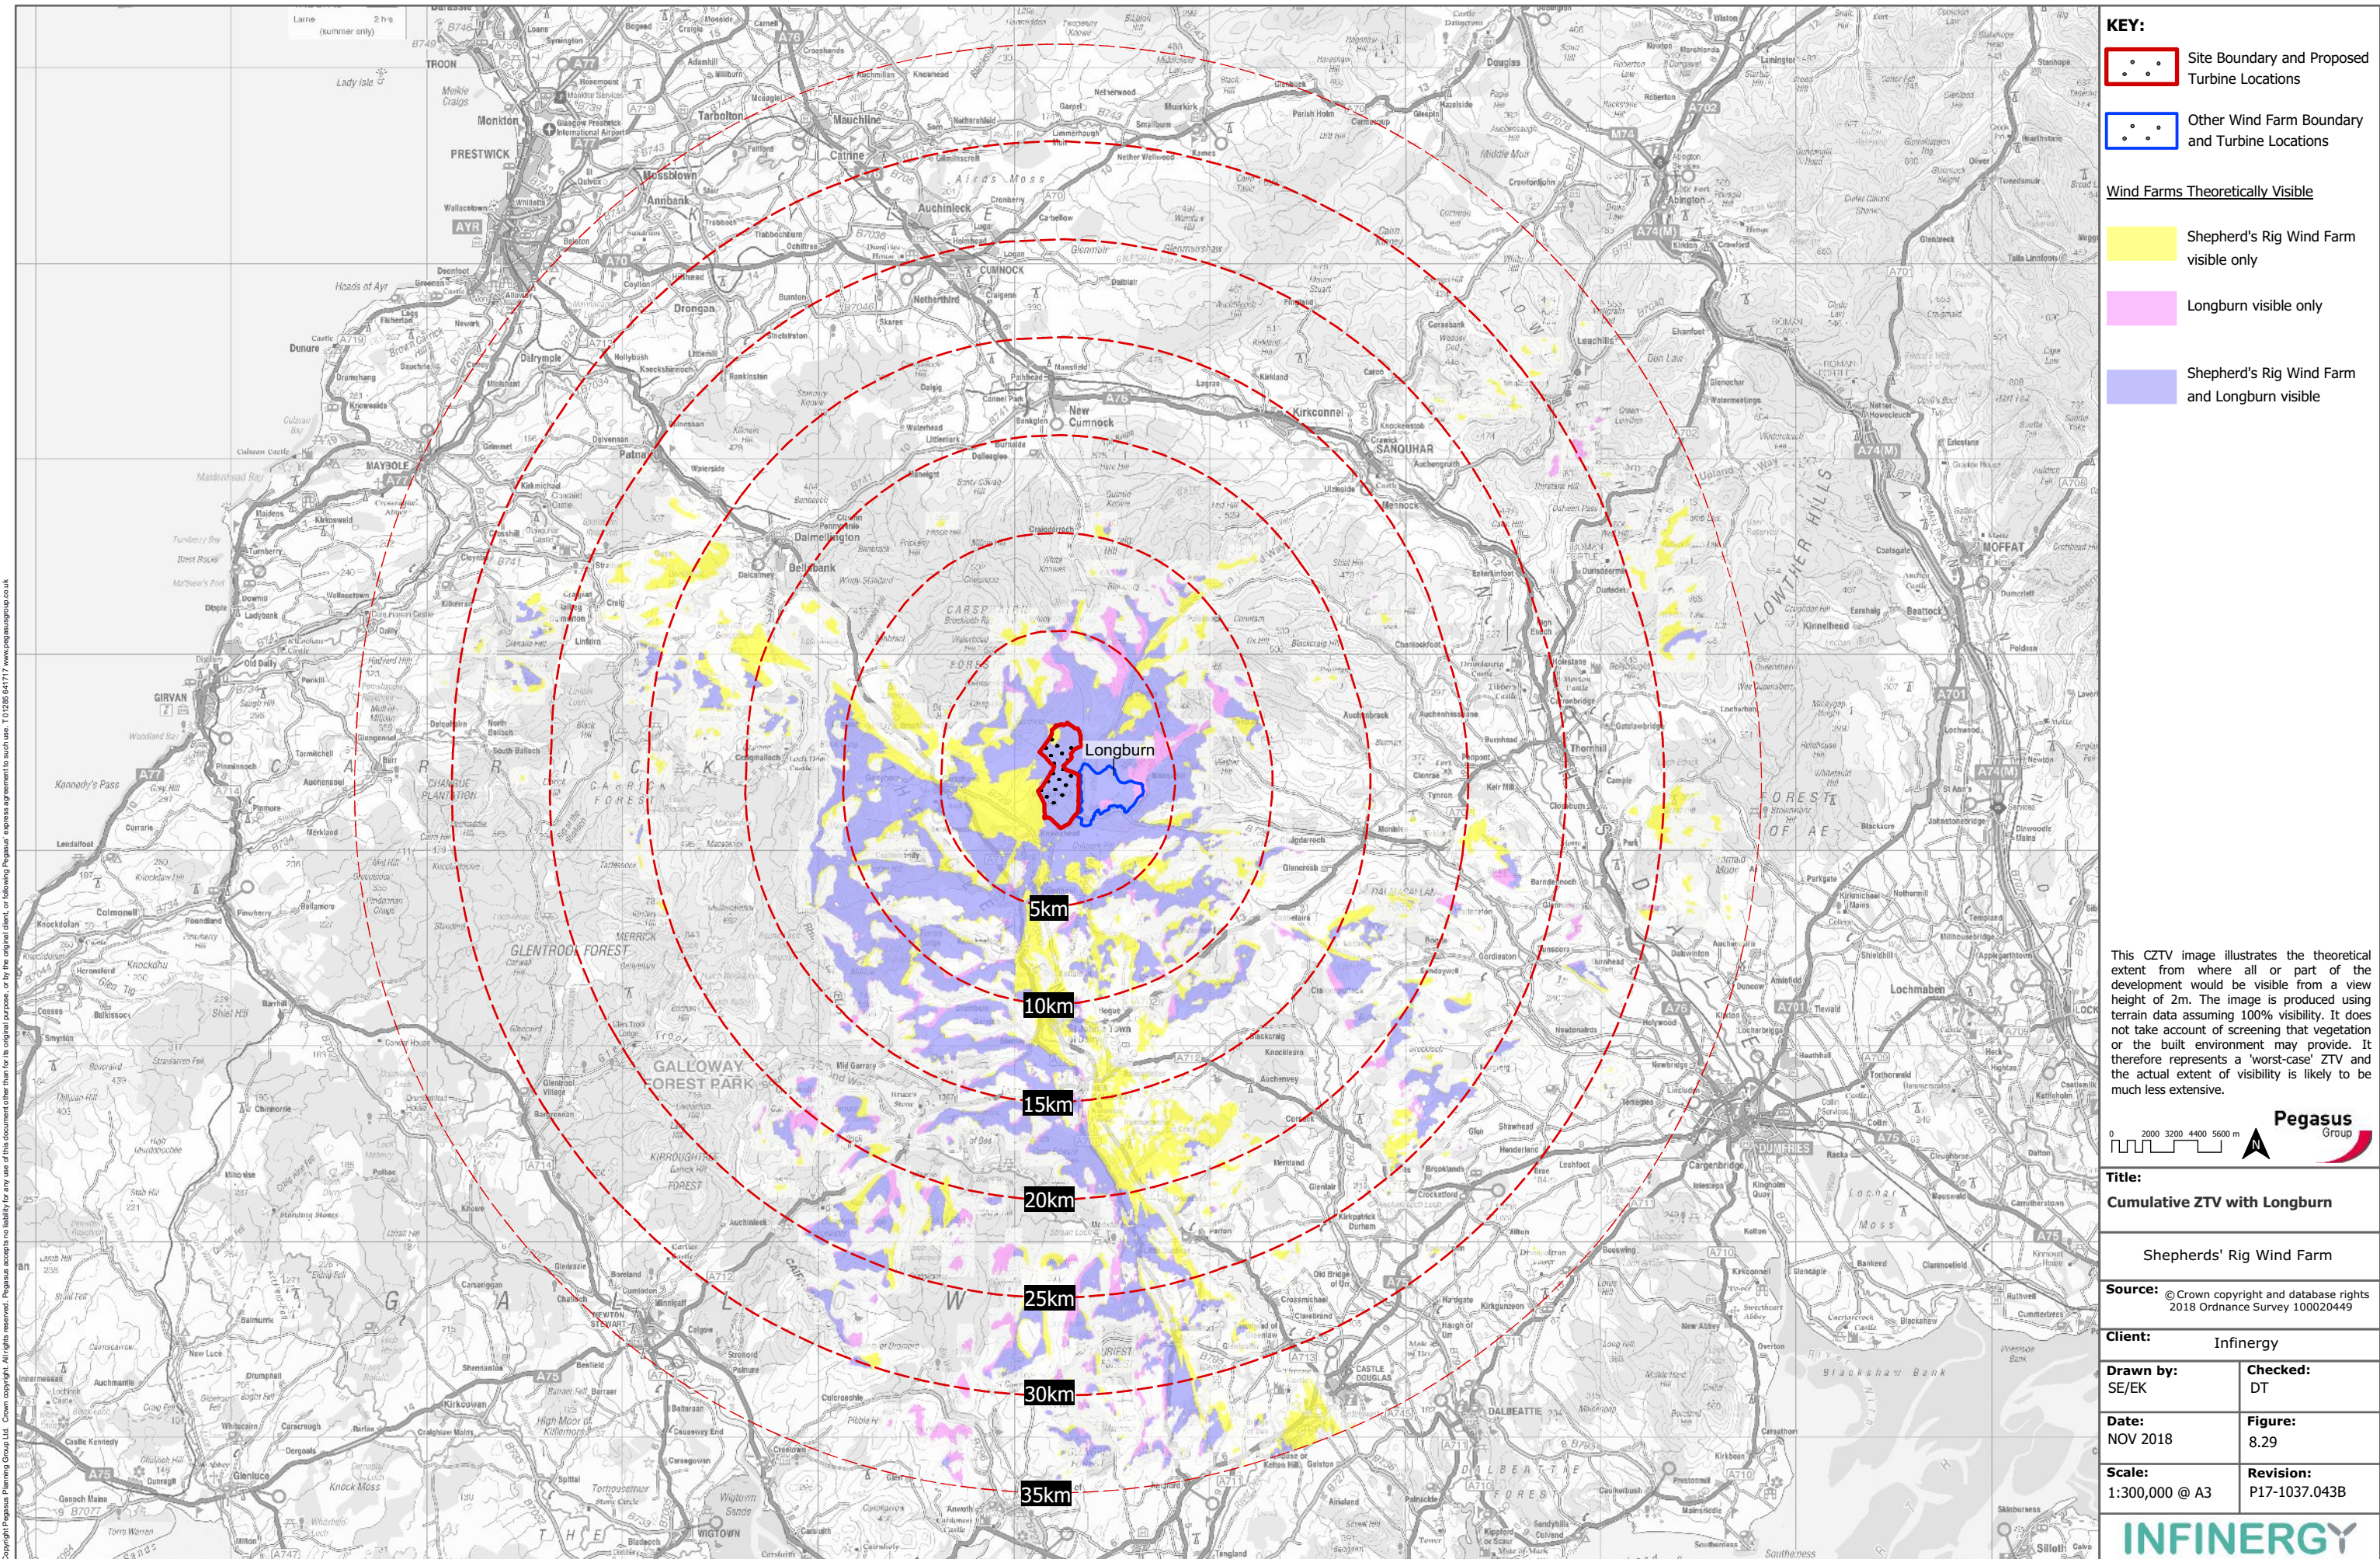

Figure 8.29: Cumulative ZTV with Longburn

- KEY:**
- Site Boundary and Proposed Turbine Locations
 - Other Wind Farm Boundary and Turbine Locations

- Wind Farms Theoretically Visible**
- Shepherd's Rig Wind Farm visible only
 - Longburn visible only
 - Shepherd's Rig Wind Farm and Longburn visible

This CZTV image illustrates the theoretical extent from where all or part of the development would be visible from a view height of 2m. The image is produced using terrain data assuming 100% visibility. It does not take account of screening that vegetation or the built environment may provide. It therefore represents a 'worst-case' ZTV and the actual extent of visibility is likely to be much less extensive.
